

Driver-Car Interaction and Safety Conference

Prague, Czech Republic, 2016

The 5th volume of the international conference (formerly DCII – Driver-Car Interaction&Interfaces) took place on June 16th-17th in Prague. The Conference gave floor to participants from the Netherlands, Belgium, Macedonia, Russia, Kazakhstan, Slovakia and the Czech Republic in presentation or poster form. The event included two sections – international and Czech. 16 presentations from speakers from different countries and 11 posters and 2 WIP contributions were presented at international section. The Czech section covered historical presentations and was a part of thematic exhibition of Czech car bodywork focused on cabriolet and coupé style cars, which included the ceremonial opening of the public exhibition with coverage in local news.
